USER MANUAL

For

Android Mobile Application

1. Application Overview

The system we have developed is designed to provide users with comprehensive information about various courses, course centers, and easy registration options. It aims to streamline the process of accessing course details and simplifying the registration process for interested individuals. Additionally, the system offers a summary of all available courses, allowing users to get a quick overview of the offerings.

By leveraging this system, users can efficiently explore different courses and gather essential information such as course descriptions, schedules, prerequisites, instructors, and any other relevant details. They can also access information about course centers, including their locations, facilities, and contact information.

2. Organization of the Manual
